

兔抗 BFAR 多克隆抗体

中文名称: 兔抗 BFAR 多克隆抗体

英文名称: Anti-BFAR rabbit polyclonal antibody

别名: BAR; RNF47

相关类别: 一抗

储存: 冷冻 (-20℃)

宿主: Rabbit

抗原: BFAR

反应种属: Human

标记物: Unconjugate

克隆类型: rabbit polyclonal

技术规格

Background:	A novel protein, BAR, for bifunctional apoptosis regulator, contains domains that enable it to interact with components of both major apoptosis pathways, where it negatively regulates apoptotic signaling. Like the other anti-apoptosis proteins Bap31 and FLIP, BAR contains a DED-like domain that is capable of suppressing apoptosis mediated at the receptor level. In addition, BAR contains a domain that also enables it to interact with the mitochondrial Bcl-2 family of proteins. The presence of these various RING, SAM, DED and TM domains suggests that BAR may serve as a scaffold protein that integrates signaling components of the cells apoptosis-regulatory machinery.
Applications:	ELISA, IHC

Name of antibody:	BFAR
Immunogen:	Synthetic peptide of human BFAR
Full name:	bifunctional apoptosis regulator
Synonyms:	BAR; RNF47
SwissProt:	Q9NZS9
IHC positive control:	Human gastric cancer
IHC Recommend dilution:	25-100
