

## KAZN 抗原（重组蛋白）

中文名称： KAZN 抗原（重组蛋白）

英文名称： KAZN Antigen (Recombinant Protein)

别名： kazrin, periplakin interacting protein; KAZ

相关类别： 抗原

储存： 冷冻（-20℃）

### 概述

Fusion protein corresponding to a region derived from 626-775 amino acids of human KAZN

### 技术规格

<b>Full name:</b>	kazrin, periplakin interacting protein
<b>Synonyms:</b>	KAZ
<b>Swissprot:</b>	Q674X7
<b>Gene Accession:</b>	BC113621
<b>Purity:</b>	>85%, as determined by Coomassie blue stained SDS-PAGE
<b>Expression system:</b>	Escherichia coli
<b>Tags:</b>	His tag C-Terminus, GST tag N-Terminus
<b>Background:</b>	This gene encodes a protein that plays a role in desmosome assembly, cell adhesion, cytoskeletal organization, and epidermal differentiation. This protein co-localizes with desmoplakin and the cytolinker protein periplakin. In general, this protein localizes to the nucleus, desmosomes, cell membrane, and cortical actin-based structures. Some isoforms of this protein also associate with microtubules. Alternative splicing results in multiple transcript variants encoding distinct isoforms. Additional splice variants have been described but their biological validity has not been verified.
