

兔抗 EFNA1 多克隆抗体

中文名称：兔抗 EFNA1 多克隆抗体

英文名称： Anti-EFNA1 rabbit polyclonal antibody

别名： B61, EFL1, ECKLG, EPLG1, LERK1, LERK-1, TNFAIP4

储存： 冷冻（-20℃）

抗原： EFNA1

宿主： Rabbit

相关类别： 一抗

反应种属： Human, Mouse, Rat

标记物： Unconjugate

克隆类型： rabbit polyclonal

技术规格

Background:

This gene encodes a member of the ephrin (EPH) family. The ephrins and EPH-related receptors comprise the largest subfamily of receptor protein-tyrosine kinases and have been implicated in mediating developmental events, especially in the nervous system and in erythropoiesis. Based on their structures and sequence relationships, ephrins are divided into the ephrin-A (EFNA) class, which are anchored to the membrane by a glycosylphosphatidylinositol linkage, and the ephrin-B (EFNB) class, which are transmembrane proteins. This gene encodes an EFNA class ephrin which binds to the EPHA2, EPHA4, EPHA5, EPHA6, and EPHA7 receptors. Two transcript variants that encode different isoforms were identified through sequence analysis.

	sis.
Applications:	ELISA, IHC
Name of antibody:	EFNA1
Immunogen:	Fusion protein of human EFNA1
Full name:	ephrin-A1
Synonyms :	B61, EFL1, ECKLG, EPLG1, LERK1, LERK-1, TNFAIP4
SwissProt:	P20827
ELISA Recommended dilution:	1000-5000
IHC positive control:	Human liver cancer and human thyroid cancer
IHC Recommend dilution:	50-150
