

## 兔抗 MICA 多克隆抗体

中文名称:	兔抗 MICA 多克隆抗体
英文名称:	Anti-MICA rabbit polyclonal antibody
别名:	MHC class I polypeptide-related sequence A; MIC-A; PERB11.1
相关类别:	一抗
储存:	冷冻 (-20℃)
宿主:	Rabbit
抗原:	MICA
反应种属:	Human
标记物:	Unconjugate
克隆类型:	rabbit polyclonal

### 技术规格

<b>Background:</b>	This gene encodes the highly polymorphic major histocompatibility complex class I chain-related protein A. The protein product is expressed on the cell surface, although unlike canonical class I molecules it does not seem to associate with beta-2-microglobulin. It is a ligand for the NK G2-D type II integral membrane protein receptor. The protein functions as a stress-induced antigen that is broadly recognized by intestinal epithelial gamma delta T cells. Variations in this gene have been associated with susceptibility to psoriasis 1 and psoriatic arthritis, and the shedding of MICA-related antibodies and ligands is involved in the progression from monoclonal gammopathy of undetermined significance to multiple myeloma. Alternative splicing of this gene results in multiple transcript variants.
<b>Applications:</b>	ELISA, IHC

<b>Name of antibody:</b>	MICA
<b>Immunogen:</b>	Fusion protein of human MICA
<b>Full name:</b>	MHC class I polypeptide-related sequence A
<b>Synonyms:</b>	MIC-A; PERB11.1
<b>SwissProt:</b>	Q29983
<b>ELISA Recommended dilution:</b>	5000-10000
<b>IHC positive control:</b>	Human liver cancer
<b>IHC Recommend dilution:</b>	50-200
