

兔抗 RHOC 多克隆抗体

- 中文名称: 兔抗 RHOC 多克隆抗体
- 英文名称: Anti-RHOC rabbit polyclonal antibody
- 别名: H9, ARH9, ARHC, RHOH9
- 相关类别: 一抗
- 储存: 冷冻 (-20℃)
- 宿主: Rabbit
- 抗原: RHOC
- 反应种属: Human, Mouse
- 标记物: Unconjugate
- 克隆类型: rabbit polyclonal

技术规格

Background:	This gene encodes a member of the Rho family of small GTPases, which cycle between inactive GDP-bound and active GTP-bound states and function as molecular switches in signal transduction cascades. Rho proteins promote reorganization of the actin cytoskeleton and regulate cell shape, attachment, and motility. The protein encoded by this gene is prenylated at its C-terminus, and localizes to the cytoplasm and plasma membrane. It is thought to be important in cell locomotion. Overexpression of this gene is associated with tumor cell proliferation and metastasis. Multiple alternatively spliced variants, encoding the same protein, have been identified.
Applications:	ELISA, WB

Name of antibody:	RHOC
Immunogen:	Synthetic peptide of human RHOC
Full name:	Ras homolog family member C
Synonyms :	H9, ARH9, ARHC, RHOH9
SwissProt:	P08134
ELISA Recommended dilution:	1000-5000
WB Predicted band size:	22 kDa
WB Positive control:	Human fetal brain tissue
WB Recommended dilution:	500-2000
