技术规格

Background:	The ADF (actin-depolymerizing factor)/cofilin family (see MIM 601442) is composed of stimulus-responsive mediators of actin dynamics. ADF/cofilin proteins are inactivated by kinases such as LIM domain kinase-1 (LIMK1; MIM 601329). The SSH family appears to play a role in actin dynamics by reactivating ADF/cofilin proteins in vivo (Niwa et al., 2002 [PubMed 11832213]).
Applications:	ELISA, IHC
Name of antibody:	SSH3
Immunogen:	Fusion protein of human SSH3
Full name:	slingshot protein phosphatase 3

SwissProt:	Q8TE77
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human esophagus cancer and Human breast cancer
